2	Contents	i
3	List of Figures	vi
4	List of Tables	viii
5	I Overview	2
6	1 Introduction (Schellman)	3
7	1.1 Introduction(<i>Schellman-draft</i>)	4
8	1.2 ProtoDUNE tests at CERN (<i>Schellman-draft</i>)	6
9	1.2.1 ProtoDUNE Single Phase	6
10	1.2.2 ProtoDUNE Dual-Phase(<i>Pennacchio - draft</i>)	8
11	1.2.3 Conclusions from prototype tests (<i>Schellman draft</i>)	11
12	1.3 ProtoDUNE simulation discussion (<i>Yang-needed</i>)	14
13	1.4 On to full DUNE (<i>Schellma-draft</i>)	14
14	1.5 Near Detectors (<i>Schellman/Muether - draft</i>)	16
15	1.5.1 pixel LArTPC - ND-Lar (<i>Muether - draft</i>)	16
16	1.5.2 Near Detector Gaseous Argon TPC(<i>Muether - draft</i>)	17
17	1.6 Relation of Physics Goals and Computing Challenges(<i>Schellman - draft</i>)	18
18	1.7 What is missing?	19
19	2 Data and Processing Volume Estimates (Schellman, Junk, Muether - started numbers and figures need updating)	20
20	2.1 Introduction (<i>Schellman - need a paragraph</i>)	20
21	2.2 Assumptions (<i>Schellman - draft</i>)	20
22	2.2.1 Raw data assumptions (<i>Schellman - draft</i>)	20
23	2.2.2 Derived data assumptions (<i>Schellman - draft</i>)	21
24	2.3 ProtoDUNE (<i>Schellman - draft</i>)	21
25	2.4 ProtoDUNE II VD and HD discussion (<i>Schellman/Kirby/Pennacchio - needed</i>)	22
26	2.5 FD (<i>Schellman - draft</i>)	22
27	2.6 ND (<i>Schellman/Muether - check</i>)	23
28	2.7 Summary	25
29		
30	3 Use Cases	28

1	3.1	Introduction (<i>Schellman-draft</i>)	28
2	3.2	ProtoDUNE data: raw data acquisition, cataloging and storage (<i>Schellman - draft</i>) . . .	28
3	3.2.1	ProtoDUNE Data: DAQ to Raw Data store (<i>Schellman-draft</i>)	28
4	3.3	ProtoDUNE data: reconstruction - hits (<i>Schellman-draft</i>)	29
5	3.3.1	Raw data to reconstructed hits (<i>Schellman-draft</i>)	29
6	3.3.2	Hits to Calibration (<i>Schellman-draft</i>)	29
7	3.3.3	Hits to reconstructed interactions	29
8	3.3.4	Interactions to Analysis	29
9	3.3.5	Analysis (<i>Schellman/David/Calcutt - needs work</i>)	31
10	3.3.6	ProtoDUNE simulation (<i>Tingjun? -needed</i>)	31
11	3.4	Normal and SNB Far Detector: acquisition and reconstruction (<i>Schellman - started</i>) .	32
12	3.5	ND Beam Data: Beam data acquisition and reconstruction (<i>Mathew Muether/Tom</i>	
13		<i>Junk - needed</i>)	32
14	3.6	DUNE Simulation (<i>Junk/Schellman/Muether</i>)	32
15	3.6.1)	33
16	3.6.2	Beam simulation(<i>Junk-draft</i>)	33
17	3.6.3	Interaction simulation(<i>Schellman-draft</i>)	33
18	3.6.4	Particle tracing(<i>Junk-draft</i>)	33
19	3.6.5	Detector response simulation(<i>Schellman-draft</i>)	33
20	3.6.6	Overlay(<i>Schellman-draft</i>)	33
21	3.6.7	Reconstruction	33
22	3.6.8	Resource requirements for simulation and reconstruction (<i>Schellman-Junk -</i>	
23		<i>needed</i>)	34
24	3.7	Oscillation analysis	34
25	3.8	Supernova data: acquisition and fast reconstruction	34
26	3.8.1	Fast (1 day turnaround)	34
27	3.8.2	Full Supernova	34
28	3.9	Solar/BSM analysis	34
29	3.10	Calibration data: acquisition, reconstruction and use	34
30	3.11	Hardware database use case	34
31	3.12	Analysis Facility	34
32	3.13	What's missing?	34
33	3.14	Data movement	34
34	4	Cooperation strategy (Kirby, Schellman, McNab)	35
35	4.0.1	overview of strategy(<i>Schellman-needed</i>)	35
36	4.0.2	Relation with Fermilab, CERN, Sanford (<i>Schellman -needed</i>)	35
37	4.0.3	HSF (<i>Laycock, David -needed</i>)	35
38	4.0.4	Training (<i>C. David -needed</i>)	35
39	4.0.5	WLCG/OSG (<i>McNab and Kirby -needed</i>)	35
40	4.0.6	Benchmarking (<i>McNab -needed</i>)	35
41	4.0.7	Rucio (<i>Timm -needed</i>)	35
42	4.0.8	Networking	35
43	4.0.9	LArSoft (<i>Tom/Kirby-draft</i>)	36
44	4.0.10	Art / ... (<i>Tom -draft</i>)	36
45	4.0.11	Authentication (<i>Timm - needed</i>)	36

1	II Algorithms and Frameworks	37
2	5 Frameworks (Andrew Norman, Paul Laycock, Mathew Muether)	39
3	5.1 Current status (<i>Junk/Muether - draft</i>)	39
4	5.2 Requirements summary -(<i>Norman/Laycock in progress</i>)	40
5	5.2.1 Data and I/O layer	40
6	5.2.2 Concurrency	40
7	5.2.3 Reproducibility and provenance	41
8	5.2.4 Analysis(<i>Norman/Laycock - needs more</i>)	41
9	5.3 HSF software frameworks review (<i>Norman/Laycock needs a lot more</i>)	41
10	5.3.1 The closest match to Deep Underground Neutrino Experiment (DUNE)'s re-	
11	quirements(<i>Norman/Laycock - needs more</i>)	41
12	5.3.2 Missing functionality (<i>Norman/Laycock - needs more</i>)	42
13	5.4 Plan to go forward (<i>Norman -needed</i>)	42
14	6 Databases (Paul Laycock and Norm Buchanan -draft)	43
15	6.1 Introduction	43
16	6.2 Conditions Database	43
17	6.2.1 Metadata (<i>Laycock/Buchanan - needs more</i>)	43
18	6.3 Run Configuration Database	44
19	6.4 Data Quality and Monitoring Database	44
20	6.5 Offline Calibration Database	44
21	6.6 Slow Control Database	45
22	6.7 Beam Conditions Database - IFBeam	45
23	6.8 Hardware Database	45
24	6.9 Service and Maintenance	46
25	6.10 Need a section on database R+D needs - (<i>Buchanan and Laycock - needed</i>)	46
26	6.11 What's missing?	46
27	7 Applications overview	47
28	7.1 Simulation Algorithms (<i>TRJ - draft</i>)	48
29	7.1.1 Beam simulation	48
30	7.2 Reconstruction Algorithms(<i>TRJ - draft</i>)	49
31	7.2.1 Liquid Argon TPC Reconstruction	49
32	7.3 Anything missing? (<i>??? -needed</i>)	52
33	7.4 Analysis Algorithms (<i>Who - needed</i>)	52
34	III Global Computing Model	53
35	8 Overview of Computing Model (McNab - draft)	54
36	8.1 broad picture section (<i>Schellman/McNab -needed</i>)	54
37	8.2 Sites and Services (<i>McNab - draft</i>)	54
38	8.3 Sites, Federations, and Countries(<i>McNab - draft</i>)	55
39	8.4 Types of service(<i>McNab - draft</i>)	55
40	8.4.1 Network(<i>McNab - draft</i>)	55
41	8.4.2 DUNE Computing Element(<i>McNab - draft</i>)	55
42	8.4.3 Data Cache(<i>McNab - draft</i>)	56

1	8.4.4 DUNE Storage Element(<i>McNab - draft</i>)	56
2	8.4.5 DUNE Data Archive(<i>McNab - needs work</i>)	56
3	8.5 Requirements for computing services (<i>McNab - needs work</i>)	56
4	9 Site Resources (<i>McNab - in progress</i>)	57
5	9.1 Overview of sites	57
6	9.2 Grid sites	57
7	9.3 High Performance Computing sites	57
8	9.4 Cloud providers	57
9	10 Data Placement (<i>Steve, Kirby and Heidi - needed</i>)	58
10	11 Networking (<i>Mike Kirby and Peter Clarke - in progress</i>)	59
11	12 Workflow Examples (<i>Herner, Timm, McNab - needed</i>)	60
12	IV Computing Services (<i>Steve Timm</i>)	61
13	13 Services Overview (<i>Timm - needs more</i>)	62
14	13.1 Introduction	62
15	13.2 Host Lab Provided Services	62
16	13.3 Remote Site Provided Services	62
17	13.4 Cloud Hosted Services	62
18	14 Data Management (<i>Steve Timm and Robert Illingworth - draft</i>)	63
19	14.1 Introduction	63
20	14.2 Data Ingest Manager	63
21	14.3 Replica Manager	64
22	14.4 Metadata Catalog	65
23	14.5 Data Dispatcher	65
24	14.6 Tools	65
25	15 Workload Management - (<i>Ken Herner - needed - merge into workflow?</i>)	66
26	16 Workflow Management (<i>McNab/Timm - needed</i>)	67
27	17 Information Systems (<i>McNab - needed</i>)	68
28	18 Monitoring (<i>Andrew McNab, Steve Timm, Raja Nandakumar, Jon Hays - in progress</i>)	69
29	18.1 Tools	69
30	18.1.1 ETF	69
31	18.1.2 PerfSonar	70
32	18.2 Summary of Assumptions and Resource Requirements	71
33	19 Authentication/Authorization (<i>Timm - draft</i>)	72
34	19.1 Authentication and Authorization for Distributed Computing	72
35	19.1.1 Obtaining access to DUNE Computing	72
36	19.1.2 Current State of Authentication and Authorization	72

1	19.1.3 Planned Changes to Authentication Currently Under Way	73
2	19.1.4 Requirements for Authentication/Authorization Going Forward	73
3	20 Code Management (Tom Junk, Mathew Muether, David Adams - draft)	74
4	20.1 Liquid Argon TPC Code Management	74
5	20.2 Near Detector Code Management	76
6	20.3 Continuous Integration	76
7	V Resources Summary	78
8	VI Collaboration	79
9	21 Consortium Organization and Collaborative Tools (Schellman - needed)	80
10	22 Computing Contributions Board (CCB) (Peter Clarke - draft)	81
11	23 Data Lifetimes and Preservation: (Norman, Clarke, Fuess - needed)	83
12	24 Training and Documentation (Claire David, Mike Kirby - draft)	84
13	24.1 Documentation	84
14	24.1.1 Wikis	84
15	24.1.2 Redmine	85
16	24.1.3 Code Documentation	85
17	24.1.4 GitHub	85
18	24.2 Training	85
19	24.2.1 Goals of DUNE Training	85
20	24.2.2 Training sessions	86
21	24.2.3 Training tools	86
22	24.2.4 Partnering with other collaborations	87
23	24.2.5 From trainee to mentor, user to lecturer	87
24	24.2.6 Future formats	87
25	VII Summary and Plans (all- needed)	88
26	Glossary	90
27	References	97
